ABOUT

A degree in Educational Sciences from Alzahra University sits next to my training in UI and product design, so the work stays practical and clear. I start with the decision a person is actually making, then shape the flow, the interface, and a prototype that can be walked before anything is built.

01

Research

Questionnaires, findings, and the decision itself.

02

Structure

User flows and wireframes before the pixels.

03

Interface

UI, components, and a system that holds together.

04

Prototype

A clickable path, walked before it is built.

DESIGN SKILLS

UX Research · User Flow · Wireframing · Persona Creation · Prototyping · UI Design · Design Systems

SOFT SKILLS

Communication · Teamwork · Problem Solving · Critical Thinking · Self-learning · Design Mindset

EDUCATION

Sep 2021 — Sep 2025

Bachelor's Degree in Educational Sciences

Alzahra University

19 Oct 2025 · 36 hours

UI Design Course

The Ehsan Ez Academy, 10th season. Instructor: Ehsan Ezzati. Certificate received.

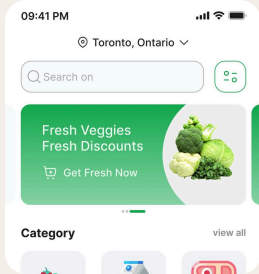

Autumn 2025 · 58 hours

Product Design

Amanj Academy. Instructor: Ali Babaei. Certificate received.

SELECTED WORK

Interfaces for shopping, study, care, and everyday habits.

01 MOBILE · GROCERY

Fresh Drop

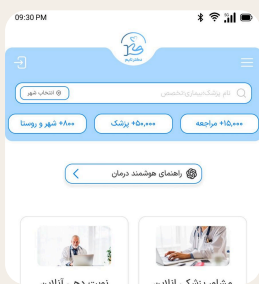

A grocery delivery app for simple, fast shopping. The home screen leads with fresh produce, categories, and featured products, each with a price and a one-tap add. I built a library of more than fifty components, and a prototype through onboarding, search, cart, checkout, orders, profile, and sign-in.

02 WEB · EDUCATION

Konkooortaster

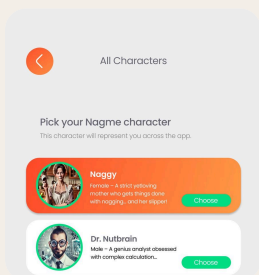

The complete interface for a Persian platform focused on university admission guidance. I designed a reusable system for authentication, the user dashboard, payments, course pages, news, and downloads, so a long content site stays consistent. The live site is konkooortaster.ir.

03 CASE STUDY · HEALTH

DrTime

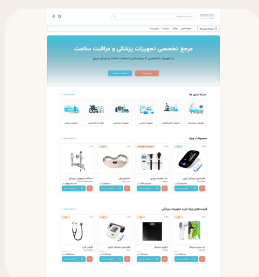

A booking flow that helps people choose a doctor faster and with more confidence. I asked 30 people, aged 20–40, with a qualitative questionnaire. The blockers were choosing a specialist (40%), waiting time (33%), and insurance clarity (27%). Specialties, an approximate wait, and accepted insurance are visible before anyone commits.

04 MOBILE · WELLNESS

NagMe

A health app for breaking bad habits and building better ones. Progress earns coins that unlock characters who nag and motivate you to stay on track. The flow covers character choice, rewards, and a short health questionnaire that only asks a follow-up when the answer needs one.

05 WEB · CONCEPT

Mediora

A Persian, right-to-left storefront for medical equipment and health monitoring. Clear categories, product cards with a photo, rating, and price, and a calm path from search to purchase keep the page trustworthy instead of crowded.

Thanks for looking :)
